

Adapting to Global Warming -- A Guidebook

This is a draft table of contents and subject to change based on peer review.

Written by King County Executive Office and the Climate Impacts Group, with contributions by ICLEI - Local Governments for Sustainability

Published by ICLEI - Local Governments for Sustainability and distributed as a component of training for ICLEI's Climate Safe Communities Campaign

TABLE OF CONTENTS

1. Foreword: Why regional and local government must lead the way on global warming
2. Take action, take advantage: an introduction by King County Executive Ron Sims and the Climate Impacts Group
 - 2.1 A growing movement at the local level
 - 2.1.1 State and local governments
 - 2.1.2 King County, Washington
 - 2.2 The value of science - public policy partnerships
3. What global warming means for the US and its regions
 - 3.1 Global change in brief
 - 3.2 Regional consequences of global warming
 - 3.2.1 Northeast
 - 3.2.2 Southeast
 - 3.2.3 Midwest
 - 3.2.4 Great Plains
 - 3.2.5 West
 - 3.2.6 Pacific Northwest
 - 3.2.7 Alaska
 - 3.2.8 Islands of the Caribbean and the Pacific
4. Getting started
 - 4.1 Why "waiting it out" is not an option
 - 4.2 What preparing for global warming really means
 - 4.3 Moving beyond the common barriers
 - 4.3.1 "Global warming is not my problem"
 - 4.3.2 "I'll deal with global warming when I see it happening"
 - 4.3.3 "I'll deal with global warming when you can tell me exactly what I need to plan for"
 - 4.3.4 "I don't think global warming will affect my community"
 - 4.3.5 "I'll wait until I see other communities preparing for climate change"
 - 4.3.6 "I don't have time or money to deal with global warming right now"
 - 4.3.7 "I don't know how to plan for climate change"
 - 4.3.8 "I don't have enough authority to plan for global warming"

5. Preparing for global warming
 - 5.1 Generate interest in preparing for global warming
 - 5.2 Create a global warming action team
 - 5.3 Start using best available science to identify global warming impacts in your region
 - 5.4 Identify your community's vulnerabilities to global warming
 - 5.4.1. Why it is important -- and what it means -- to "audit" your sectors through the lens of global warming vulnerability
 - 5.4.2. How sensitive are your sectors to global warming?
 - 5.4.3. How exposed?
 - 5.4.4. How adaptable?
 - 5.4.5. Adding it up: How vulnerable are we to global warming?
 - 5.5 Identify and select strategies for adapting to global warming impacts
 - 5.5.1. Set goals
 - 5.5.2. Review current infrastructure, policies and practices in light of vulnerabilities and proposed strategies
 - 5.5.3. Identify options
 - 5.5.4. Select options
 - 5.6 Put your plans into motion
 - 5.7 Be flexible: managing risk and uncertainty
6. Real-world solutions
 - 6.1 Agriculture
 - 6.2 Emergency management
 - 6.3 Energy
 - 6.4 Flood control
 - 6.5 Natural resources and environment protection
 - 6.6 Parks and recreation
 - 6.7 Planning, development and zoning
 - 6.8 Ports and marinas
 - 6.9 Public health
 - 6.10 Stormwater control
 - 6.11 Transportation
 - 6.12 Wastewater treatment
 - 6.13 Water supply
7. Actions speak louder than words
